**CONTACTS**

## THIS IS WHAT YOU CAN DO WITH US

**think about yourself!**

The implant system you need is not in our catalogue ... don't worry: here is the solution for you!

**Send us the original components** of the connection you are interested in and we will perform a **reverse engineering** procedure on them to obtain the measurements required to make your product.

Moreover, we are able to set the **digital flow to allow you to design structures autonomously in the future.**

In other words, we will provide **AQ scan abutments and dedicated implant libraries.**

**Contact us** for more information using our **whatsapp** support number dedicated to implant libraries  
( **+39 324 0493770** )
